

# 3 MONTH TRANSFORMATION

**Invest in  
yourself and  
watch reality  
begin to shift  
around you**

EBOOK

2020

DAWSON ENGEL

**Now,**

I could load this eBook up with every fact  
known to man about fitness-

**But who actually wants that?**

You're here because you  
want change

**That is exactly what I am here  
to deliver.**

# **Fitness is Not Hard**

It starts with mindset- if you are willing to  
make a change,

You WILL Change

**\*And since you made this step- I know deep down- you can change**

# 21 Days

95 % of your entire day is ran by  
your subconscious mind

This means that anything in that 95%, is  
almost effortless. It takes 0 Willpower

People ask me all the time how I can choose to  
go to the gym every day

**and the fact is, i'm not.**

think about it, do you have to consciously choose to  
brush your teeth each morning or is it automatic?

It takes 21 days to form a habit, 21  
days of willpower and then your  
smooth coasting

# The Basics

3 components to fitness and  
how they work together

Fitness is a discipline equally divided into 3  
categories: Workouts (1/3), Diet (1/3), and  
Sleep (1/3)

This is how it works, **1st** you workout to damage  
your muscles, **2nd** you have a good diet to maintain  
resources for the body, **3rd** you sleep and allow the  
body to use the available resources to rebuild  
stronger

# Metabolism Biohack

You can force your body to speed up its  
own metabolism

Faster Metabolism = Leaner Muscle + More  
energy

Crazy right, okay here's how you do it.

You want to create a **constant flow of energy** into the body. This will then trick the body into believing that you no longer need to store energy (fat) because you always have a steady flow in.

\*\* Ex). Instead of 2 Huge meals, spread out into  
3-5 smaller meals

# Gain or Lose?

**Simple,**

- 1 Download the "Myfitnesspal" app
- 2 Follow the guided steps in order to find your personal calorie goal
- 3 For maximum results, take 5 min out of your day to track each meal
- (4) If cutting, cardio is a massive benefit to you, use this as a tool to knock down the daily calories by burning them off

**\*\*Highly suggest you try out "Myfitnesspal" app**

# Example Diet Plan

- 1 Eggs, bagel w/ peanut butter
- 2 Snack (Protein  
Shake w/ fruits)
- 3 Rice w/ Chicken (or Salmon)  
+ Broccoli
- 4 Snack (Protein  
Shake w/ fruits)
- 5 Gainer Shake or Clean meat w/  
vegetable

# **Gaining Hack**

For the fellas that have trouble hitting the calorie mark, this is the secret I used.

**USE a Gainer Shake!**

Create your own, or purchase a premade option

**Here is how you make it:**

**(900-1000 Calories)**

**1/2 Cup Old Fashioned Oats**

**2 Tbsp Peanut Butter**

**2 Tbsp Nutella (or Other Sweetener)**

**1-2 Cups of Milk**

**1 Cup of Frozen Fruit of Choice**

**1-2 Scoops of Protein Powder**

**\*\*Blender not included**

**\*important**

# Progressive Overload

This strategy will allow you to build muscle rapidly, or maintain as much muscle during a cut

Progressive overloading is looked at in 2 different ways:

1: Doing a few **more reps** than the last session

2: **Increasing weight** each session

The human body is designed to adapt

**\*\*This will force your body to adapt to the external challenge**

# Sleep

Putting this for the demigods  
who think they never need rest

- Teens: **8-10** hours
- Adults: **7-9** hours

No Sleep = No Progress

**\*\*1 Rest Day a week will also play a big  
role in allowing your body a break to  
catch up**

**Bonus Habit That  
Will Change You  
Immensely**

# Mindset Hack

**Journaling**

# **This Specific Journaling will make you:**

happier, focused, more productive, and most importantly- It will shift your identity over the coming weeks/months into a completely new version of yourself.

## How it works ---

### **This is a simple 4 part journal**

In the first part of the journal- you will write one sentence starting off the day. This will clear the mind and prep you for the following parts.

The second part of the journal- you will write what you are grateful for. This will put your mind into the receiving mode and make you into a very happy person over time.

In the 3rd part of this journal- you will write what you are looking forward to in this day. This will prep your mind, activate the prefrontal cortex, and most importantly- get you excited about the day.

And lastly, one of the most important parts of the journal. We get into the **Affirmations** :

You will write 5-10 “I Am” Statements of what you want to aquire or become.

Examples: I AM Smart

I AM funny

I Am attractive

It can be nearly anything. The key is- I want you to go back through these 5-10 statements and visualize a way that you already are that

What I mean is to visualize a way that you are smart  
visualize a way that you are funny or have been.

This will affirm to your brain that “yes” you are that  
person.

Over the coming weeks/months you will begin to  
believe these things and you will become a very  
confident and radiant person.

Thank you

Thank you so much for  
believing in me and **most of**  
**all giving your inner voice**  
**a chance**

If you made it this far, I am  
beyond proud of you

**But why stop here?**

The only thing that limits  
you- is who your brain thinks  
you are.

**Period**
